

Precision Intelligence

Unlock the Power Behind Your Data

Data Conversion & Migration

We make your data future-ready

Transform legacy systems and fragmented formats into clean, structured, and usable data.

Data Visualization

See what your data is telling you

Gain expert insights to identify opportunities and challenges that enhance operational efficiency.

Data Aggregation

Your data, unified and accessible

Eliminate silos, reduce redundancy, and reveal insights from connected data sources.

Who We Are

We help you unlock the full potential of your data. With proven expertise and cutting-edge plans, we transform disparate, complex information into powerful tools that drive smarter decisions.

What We Do

Industry Expertise: From finance and healthcare to state and local government, we understand your data challenges.

Scalable Plans: Unlock maximum performance and faster insights, no matter how big your data gets.

Secure Foundations: Data safety you can trust without question.

50+ Years of Industry Knowledge

55+ Applications & Systems Expertise

400+ Data Conversions

Why Conversion & Migration Matters

Gartner reports that **83% of data migrations fail, with over half exceeding budget**. This results in missed schedules, cost overruns, and compromised data streams. The bigger risk? Poor quality that cascades into inaccurate reporting and flawed decision-making.

Legacy to Future-Ready Systems

We provide the reliable foundation needed to move outdated systems to modern platforms with confidence and precision.

Phased. Planned. Perfected.

With a structured approach from assessment to go-live, we provide clarity, control, and confidence throughout your migration.

Our Process

1. **Assessment & Planning:** Identify sources and stewards, define mappings, assess quality, create resource plans.
2. **Secure Extraction:** Data is securely extracted from legacy systems to maintain integrity and compliance.
3. **Profiling & Cleansing:** Profile structure and consistency; resolve duplicates, gaps, and formatting issues.
4. **Transformation & Mapping:** Apply business rules; map source to target; document transformation logic.
5. **Controlled Test Loading:** Load into test environment; validate accuracy and performance; move to production.
6. **Validation & Reconciliation:** Reconcile records; conduct UAT; resolve discrepancies; secure final approval.
7. **Final Cutover & Go-Live:** Freeze legacy systems; execute ETL; monitor post-go-live for stability and readiness.

Your Benefits

- **Uncompromising Accuracy & Integrity:** Rigorous validation, data retention, and reliable system performance.
- **Compliance & Security First:** Industry best practices with full privacy and regulatory alignment at every step.
- **Minimal Business Disruption:** Layered testing, proactive monitoring, and smooth cutovers that reduce downtime.
- **Reliable Outcomes:** Clear timelines, thorough documentation, and tailored control.
